

BTI announces 12-inch MaxxLife and Utility Butterfly Valves.

Offers complete solution to any pneumatic tank need.

BTI, the first butterfly valve manufacturer to design a valve specifically for the pneumatic tank trailer industry, announced today an addition to their line of MaxxLife and Utility valves, the 12-inch MaxxLife and the 12-inch Utility.

Stronger, lighter weight, and more corrosion and abrasion resistant, both valves feature an extendable neck for ease of operation, a 1-piece direct drive stem to disc connection that can range in length from 0 to 36 inches, and doesn't require any

12" Valves now available.

connecting adapters, welded parts or hardware as all other industry standard butterfly valves do. And, with the addition of the 12-inch valves, both MaxxLife and Utility offer sizes from 2 to 12 inches, a super thin disc design that can increase flow up to 20%, AND 100% of all materials manufactured and assembled in the U.S.A. MaxxLife ships standard with a new specially formulated FDA approved MaxxLife valve seat that will not harden, even under extreme temperatures, while Utility ships standard with a Buna-N seat.

According to BTI engineers, this valve will appeal to the owner, the mechanic who services the rig and the operator. No more struggling under rigs trying to open a seized butterfly valve. No more Workman's Comp claims from injured drivers. No more replacing valves after a few months of operation. The MaxxLife and Utility Butterfly Valves with extended neck makes hard to open and seized valves a thing of the past. BTI guarantees this to be the longest lasting valve you have ever owned. Period. And, as if that were not enough, it is lighter than conventional valves. On a standard 5-inch valve with neck extension, it can weigh up to 10 pounds less than the competition.

B.T.I.'s MaxxLife and Utility Butterfly Valves are another exciting example of B.T.I.'s innovative product design and is proudly and completely made in the U.S.A., including all materials and labor. As with all of its products, Bulk Tank, Inc. unconditionally guarantees this butterfly valve will outperform any similar products on the market today.
