

Is your food grade pneumatic trailer really

# Food Grade?

## Open Up to an Easier Way to Clean.

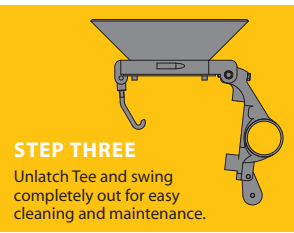

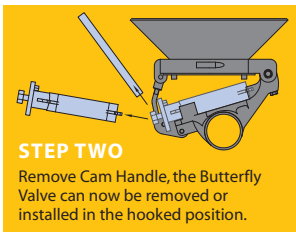

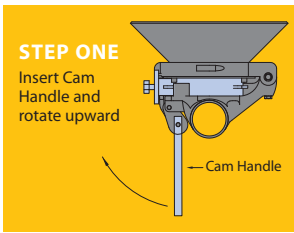

### B.T.I.'s Easy Open Hopper Tee

Above - Valve and Tee pulled from a "clean" pneumatic trailer. Mold, mildew and other harmful bacteria grow between the valve seat and hopper flange causing contamination of your food service equipment.

**Lighter, Easier to Operate, Performs Better and Costs Less— that's the trademark of a B.T.I. Product.**

### Eliminate the dangers of contamination with our new Easy Open Hopper Tee.

**1-800-841-5524**  
**www.bulktankinc.com**

**No Bolts about it.**  
You can easily remove the butterfly valve from the hopper tee for cleaning without cutting or removing bolts, saving time and money.
